Quest 5: Finding a good website

- Try a search using your deity’s name.

- Browse your results. If the websites you find are not good, you should change your search terms. Does your deity sometimes go by a different name? Try that. Or add words like, god, goddess, mythology, etc. to your search.

- Does limiting your search to only .gov or .edu sites bring up better results?
  - In your search, try adding site:.edu or site:.gov.

- Do a phrase search by “putting quotes” around words you want to be together.

- Use the CRAAP test checklist to determine if the website is appropriate for an academic research paper.
